## Profile

I am a Frontend Developer with experience in web and mobile application development. Passionate about technology and with great interest to learn and grow.

## Work Experience

### CRSoporte

Frontend Developer

- In charge of the development of the interface of several web and mobile applications for the use of different users, among them: medical personnel and merchants.
- I used Angular in its version 17 for the implementation of signals and other new features of the framework improving the performance of each application.
- I implemented NGRX for state management, centralizing the information for better management.
- I created a pagination to show the user multiple data, achieving a significant increase in performance.
- Application of best practices achieving a better performance and a better development experience.

**Tech Stack:** Angular 16 and 17, IONIC, PrimeNG, PrimeBlocks, JavaScript, TypeScript, Scss, Tailwind, Jira, Bitbucket, Scrum.

### Repsa Logistic

Frontend Developer

- I worked on the development of new features for a new version of a mobile app and a website dedicated to vehicle inspection.
- I refactored the application code to obtain a better performance and have a cleaner code at the time of development.
- we use ionic's QR reader to obtain specific information on each vehicle's revision order.

**Tech Stack:** Angular 15, Ionic Framework 5, TypeScript, Scss, html5,
